

Flooring & Points in LEED® Version 3

Indoor Air Quality | Materials and Resources

RSVP: RSVP@GreenParadigmInstitute.com or www.GreenParadigmInstitute.com

Wednesday, June 2, 2010

No Cost!

8:30 am – 10:30 am Light Breakfast provided

(Program starts promptly at 9:00 am)

Learn: U.S. Green Building Council LEED categories: Indoor Environmental Quality and Materials & Resources. See Mannington flooring and discuss FloorScore, an indoor air quality testing and performance program.

Where: [Mannington Mills Headquarters - Showroom](#), 75 Mannington Mills Rd, Salem, NJ 08079 Route 45 one mile north of Route 49 or seven miles south of Route 40. Please go to guest entrance of corporate office building, not Guard House. Attendees can call 856-339-6090 for voice recorded driving directions.

Continuing Ed: Accredited as a one hour course for IIDA (Welfare) and AIA (Health, Safety, and Welfare).

Open to real estate professionals, property owners, developers, architects, planners, engineers, kitchen and bath professionals, contractors, remodelers, flooring specialists, interior designers, home buyers, recyclers, residents, construction code officials, and all those interested in Leadership in Energy and Environmental Design (LEED®).

RSVP by Tuesday 1 June 2010 | Questions: 856 981 2973

Speaker: David Kitts, LEED AP, Vice President, Environment, Mannington Mills Corporation. Mannington is a leader in sustainability. Mannington's entire manufacturing facility in New Jersey is third party certified to ISO 14001 (Environmental Management System). David Kitts will highlight credit opportunities under various USGBC LEED rating systems: Low-Emitting Materials; Indoor Chemical and Pollutant Source Control; Recycled Content; Regional Materials; and Rapidly Renewable Materials.
